Migration limits

Monomers and additives used for the manufacturing of this grade are not regulated with specific migration limits.

In accordance with Article 2 of Directive 2002/72/EC (as amended), the overall migration shall not exceed 60 mg/kg resp. 10 mg/dm² from plastic materials and articles. Compliance with these requirements shall be measured from the finished food contact articles by using real food or appropriate food simulants at the time/temperature conditions as applicable according to the rules as specified in Directives 82/711/EC (as amended) and 85/572/EC.

The product contains alpha-tocopherol (= Vitamin E; CAS No.10191-41-0), which is authorised as a food additive with restrictions in EU (Directive 89/107/EEC).

Limits of use

Test samples made from this product fulfilled the extraction requirements according to FDA CFR 21 §177.1520 (c), as defined for the type of polymer described above. Therefore this product may be used in contact with all food types as described in table 1 of CFR 21 §176.170(c), except for articles used for packing or holding food during cooking.
